

Lab 2 – Wireshark- HTTP

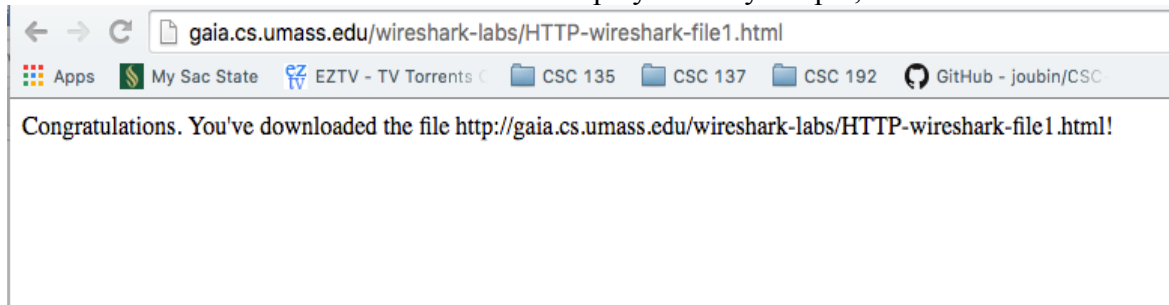

1. Start up your web browser – done.
2. Start up the Wireshark packet sniffer, as described in the introductory lab. Enter “http” in the display-filter-specification windows, so that only captured HTTP messages will be displayed later in the packet-listing window.

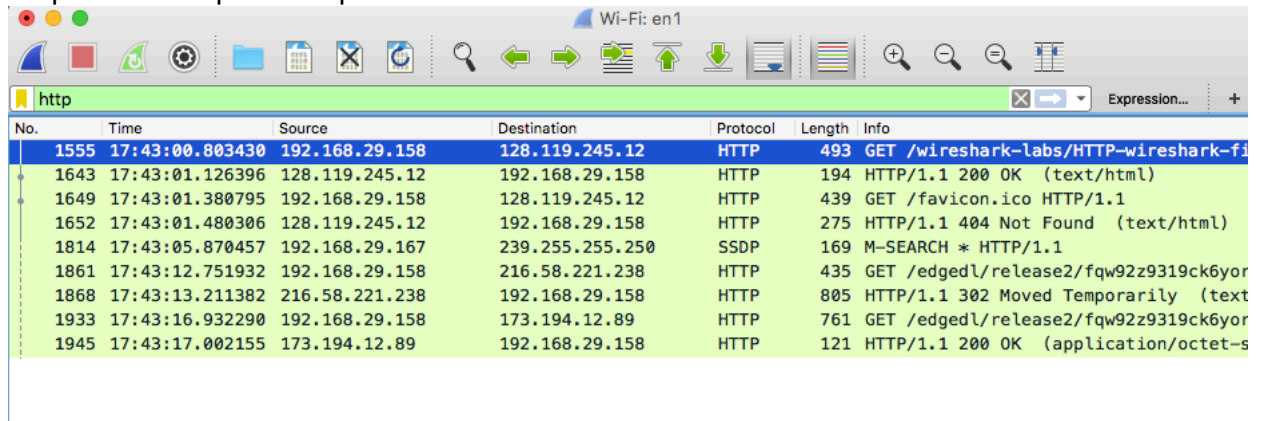

3. Wait a bit more than one minute (we'll see why shortly), and then begin Wireshark packet capture.

4. Enter the following to your browser <http://gaia.cs.umass.edu/wireshark-labs/HTTP-wireshark-file1.html> Your browser should display the very simple, one-line HTML file.

5. Stop Wireshark packet capture. - done
